

CYBER SECURITY 2026

why do you need it & what
do you need to know about it

[Download now](#)

STEP-BY-
STEP GUIDE

Are you sure your company
is ready for 2026
cybersecurity challenges?

Here's what has changed and
how to stay protected, building
expert defense teams.

Read on to learn more

THE NEW REALITY OF CYBERSECURITY

Cybercrime covers

data destruction

stolen money

reputational damage

forensics

recovery

IP theft

downtime

Cyber Crime Magazine definition

Global cost of cybersecurity is growing

Statista Market Insights

WHY DO ATTACKS KEEP RISING?

#1

More people, data, and workflows online – a larger attack surface.

#2

Attacker tooling is cheaper and more automated.

#3

Remote work + cloud expanded vulnerabilities during and after COVID-19.

TOOLS ALONE AREN'T ENOUGH

You can **AND SHOULD**
buy best-in-class solutions!

But you also need **PEOPLE** to design
controls, tune detections, triage
incidents, and run tabletop exercises.

The challenge, especially for startups,
is that senior security talent is
expensive, though not needed 24/7.

DELEGATING CYBERSECURITY ISN'T A RISK BUT **A RISK** **MANAGEMENT TOOL**

You might fear
that outsourcing
or outstaffing security
means losing control,
but in reality, it's the
opposite.

REASONS WHY TOP TECH COMPANIES TURN TO STAFF AUGMENTATION MODELS FOR CYBERSECURITY

- 1 Lower direct labor costs
- 2 Reduced overhead
- 3 Specialized expertise
- 4 You can scale up for audits, incidents, or compliance pushes, and stay lean the rest of the time.

//

Staff augmentation gives you control and agility, the two things your business needs most in 2026.

//

COMPUTER & CYBERSECURITY SPECIALISTS YOU CAN HIRE WITH **MWDN**

Security Engineer

Cloud Security Engineer

SOC Analyst (Tier 1–3)

GRC Analyst

REAL SECURITY PRACTICES FROM MWDN PROJECTS

At MWDN, our specialists work on cybersecurity and data-sensitive projects worldwide.

Here's how our clients keep their outstaffed teams as secure as in-house ones:

Ivan Protchenko · MacOS/iOS Developer ·  NDA

“Access is limited by design. Employees only see what they need. No portable drives, no unverified devices. Everything goes through the company's zero-trust network.”

Olexii Lapuka · Software Engineer ·  NDA

“All computers are managed via MDM and monitored through CrowdStrike and Vanta. Secrets rotate regularly; nothing sensitive is shared via chat.”

Anton Lukashov · DevOps Engineer ·  NDA

“We use VPNs, firewalls, disk encryption... and penalties for data leaks. Security awareness is part of the culture and not just policy.”

SECURE TOOLS & METHODS FOR OUTSTAFFED TEAMS

Every team we build follows
unified global security standards

✓ SECURITY TRAINING &
AWARENESS PROGRAMS

✓ ENDPOINT
SECURITY

✓ UNIFIED SECURITY
POLICIES

✓ INCIDENT RESPONSE
INTEGRATION

✓ ZERO TRUST
ARCHITECTURE

✓ SECURITY-FIRST
CULTURE

✓ REGULAR SECURITY
AUDITS & COMPLIANCE
CHECKS

✓ ENCRYPTED

CHANNELS

✓ DATA ENCRYPTION &
SECURE STORAGE

✓ ROBUST ACCESS
CONTROL

HOW MWDN HAS BUILT A CYBERSECURITY TEAM FOR A CALIFORNIA-BASED STARTUP

Case

CYBERSECURITY STARTUP, CALIFORNIA, USA 🇺🇸

A cybersecurity company that uses the Zero Trust Network Access system and delivers unwavering security.

CHALLENGE

Assemble a dedicated team of exceptional specialists, each possessing a distinctive set of skills. Each team member has to be the Rock Star!

MWDN SOLUTION

Every case is unique, and so are our services.
Here's what we did for this client:

Step 1

We conducted a comprehensive evaluation of **60+** candidates that included

reference
verification

cultural fit

thorough background
investigations

Step 2

We identified and assembled a talented group of **6** software developers & DevOps engineers in **25** days

25 days

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25

NUMBERS TO BE PROUD OF

70%

reduced time-to-hire
from 2 months to 3 weeks

100%

passed internal compliance
audit with **zero security incidents**

from
2 to 6

engineers client expanded
the partnership

//

**MWDN built our security team faster
than we believed possible — and our
compliance results speak for themselves.**

WHY COMPANIES TRUST MWDN?

23
years

of experience in tech hiring and a global network of vetted experts. We help companies strengthen their cybersecurity posture faster and cheaper.

OUR HIRING SERVICES

Recruitment / Headhunting [Direct Hire]

Perfect when you want to **own the team internally** from day one, but don't want to drown in sourcing or interviewing chaos.

What you get

- 1 Pre-screened candidates who match your culture and technical needs
- 2 A hiring process that removes guesswork and saves time
- 3 Direct employment under your entity or our EOR platform

Outstaffing [Your Extended Team]

Think of it as adding **top talent without adding complexity**.

What you get

- 1 Vetted engineers who integrate into your processes as part of your team
- 2 Fully managed HR, payroll, compliance, and admin on our side
- 3 Stable long-term collaboration with minimal risk or overhead
- 4 The ability to scale up as your product grows.

Outstaff-to-Hire [Start Flexible]

If you want to avoid costly hiring mistakes, this model gives you **the safest bridge**.

What you get

- 1 Start with outstaffing and test collaboration in real work
- 2 A clear and transparent option to bring the engineer in-house later
- 3 No long-term commitment until you're sure it's a perfect fit

WE HANDLE

HR MANAGEMENT

HR consulting & talent-strategy advisory

LEGAL COMPLIANCE & EMPLOYMENT REGULATIONS

Operational support & infrastructure

RECRUITMENT & VETTING OF TOP SECURITY SPECIALISTS

PAYROLL COMPLIANCE WORLDWIDE

ONBOARDING & EXIT PROCEDURES

Our clients in Fintech, Cybersecurity, Healthcare, and AI/ML rely on us for one reason:

They sleep better knowing their data & their users are safe with our specialists.

READY TO BUILD YOUR CYBERSECURE TEAM?

Let's map your priorities & connect you with the exact cybersecurity experts you need!
